The Origins Of A Man Ready To Act

Realistic Fiction Novel From Author Mikele Baugh

The Aquifer was not an old vessel, but each of the ten crew members aboard would retell each new story they created as though it were a thing of myth and legend. At the center of each tale sat the Captain, Julian. He was the one who had made The Aquifer the most respected fishing boat in his small town on the southern coast of Alaska.

His mother and father raised him on their fishing boat, The Tenth. He grew up thinly veiled in salt and knowing how to read waves and wind better than the morning paper. In time, he acquired his own boat, and it wasn't until then that he became the respectable man he was known to be.

But when faced with choosing between his own safety and the life of another creature, will he put aside his selfish tendencies to aid the greater good?

When she is not too busy being overly invested in the lives of fictional characters, Mikele Baugh spends time writing and learning new and completely useless skills. She lives in a small home with her family, which is composed largely of plants. She is a major advocate for environmental preservation and recycling.
