

My Explorations Project

**Exploring the History of Film
Cameras**

**It can take as little as five
steps to create a film
today.**

1 Why this Topic?

- I really like film photography.
- I found my grandmothers camera in the attic.
- I have never experimented with older film cameras.

2 Research

- I decided to do my infographic on the history of the film camera.
- Was challenging to sort through the abundance of information.
- Infographic.

3

Skills Learned

How to research effectively and find reliable sources.

How to actually use a Super 8 camera.

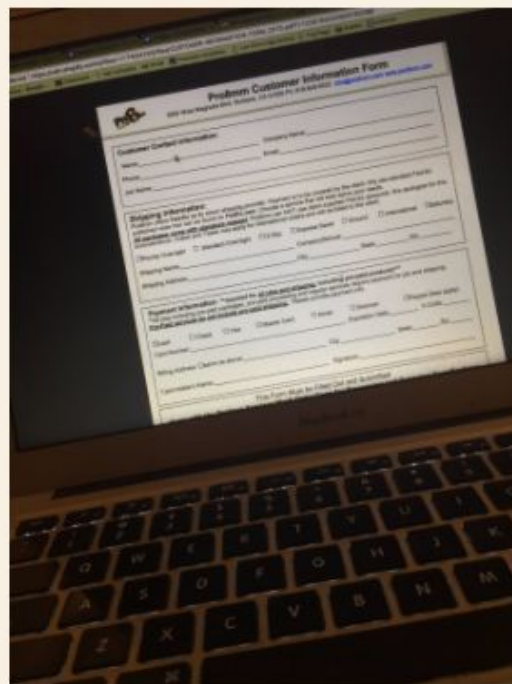

Effective time management skills.

4 Production Shots!

4.5 Production Shots Cont.!

5 A Hiccup Along the Way!

- Where can I get my film processed?
- Frantic drive to the city - rejected!
- Solution?

6

Take Away

VS

Using the film camera taught me more about how the camera actually works.

It required me to pay more attention to shutter speed and aperture.

Have to wait to get film back and it may be under/over exposed.

Digital camera can produce more reliable results.

It is faster and easier to see what you are filming.

Quality could look more professional.

Now available to the masses.

THANK YOU
